<u>Assignment 5 – Solving Constraint Satisfaction Problems</u>

Question 2 (Sudoku Solutions + numbers of calls and failures):

boards/medium.txt	boards/veryhard.txt
8 7 5 9 3 6 1 4 2	4 3 1 8 6 7 9 2 5
1 6 9 7 2 4 3 8 5	6 5 2 4 9 1 3 8 7
2 4 3 8 5 1 6 7 9	8 9 7 5 3 2 1 6 4
4 5 2 6 9 7 8 3 1	3 8 4 9 7 6 5 1 2
9 8 6 4 1 3 2 5 7	5 1 9 2 8 4 7 3 6
7 3 1 5 8 2 9 6 4	2 7 6 3 1 5 8 4 9
5 1 7 3 6 9 4 2 8	9 4 3 7 2 8 6 5 1
6 2 8 1 4 5 7 9 3	7 6 5 1 4 3 2 9 8
3 9 4 2 7 8 5 1 6	1 2 8 6 5 9 4 7 3
Calls: 3	Calls: 43
Failures: 0	Failures: 35
boards/easy.txt	boards/hard.txt
7 8 4 9 3 2 1 5 6	1 5 2 3 4 6 8 9 7
6 1 9 4 8 5 3 2 7	4 3 7 1 8 9 6 5 2
2 3 5 1 7 6 4 8 9	6 8 9 5 7 2 3 1 4
5 7 8 2 6 1 9 3 4	8 2 1 6 3 7 9 4 5
3 4 1 8 9 7 5 6 2	5 4 3 8 9 1 7 2 6
9 2 6 5 4 3 8 7 1	9 7 6 4 2 5 1 8 3
4 5 3 7 2 9 6 1 8 8 6 2 3 1 4 7 9 5 1 9 7 6 5 8 2 4 3	7 9 8 2 5 3 4 6 1 3 6 5 9 1 4 2 7 8 2 1 4 7 6 8 5 3 9 Calls: 4

Question 3:

Calls: 1

Failures: 0

All of the boards, except for the 'veryhard' one, are resolved without any failures. As we can see, the number of calls of the recursive function increases with the difficulty of the board. But the number of calls is quite more important for the hardest board than for the others which do not need more than 4 calls.

Failures: 0
